Cummins® Celect and Celect Plus ECU

Additional ECU Coverage for Your Heavy Duty Business

We are adding some additional coverage for our Heavy Duty business segment. These are available on an Exchange basis or as an R&R program with your unit. These are a perfect fit for your customer's that service the Heavy Duty Sector with drive in bays or direct over the counter sales. The ECU has always been one of our product strengths with a long history of ECU sales to the automotive industry and others. We now have offerings for both the Cummins Celect and Celect Plus along with the very popular Detroit DDEC 3 & 4 ECU applications. These are fully remanufactured units, not a "tested Ok" or "working core" unit being sold as is in many markets today. Vehicle specific programming will still need to be addressed as these are sold with the basic programming.

Cummins® #	Engine
FSR3084473	Early L10 & N14
FSR3618046	M11 & N14
FSR3619037	N14
