

# Borg Warner S300S Series Turbochargers

**SUPERIOR**  
TURBO &  
INJECTION  
COMPANIES

## BorgWarner's S300 turbos are engineered for high-efficiency and feature Forged Milled Wheel (FMW) Technology

FMW Technology incorporates improvements through superior material properties of the compressor wheel forging. This process helps resist compressor wheel failure and decrease equipment downtime.

There is no compromise when you exercise the freedom of choosing the performance and reliability of a BorgWarner replacement turbo so visit your BorgWarner Turbo Systems TurboDriven distributor today.

### Features & Benefits

- Forged Milled Compressor wheel reliability
- Six pad thrust bearing durability
- High-efficiency turbine stage
- One Year, 100,000 mile warranty

Six pad thrust bearing aids to insure turbo durability under heavy thrust loads and duty cycles

Forged milled compressor wheel (FMW) helps to eliminate low-cycle-fatigue compressor wheel burst

Efficient turbine stage enables S300S to run at less destructive speeds which extends component life, saving you money

Direct bolt-up assemblies insure ease of turbocharger installation and switch-up
