WWW.SUPERIORDIESELCOMPANIES.COM

Ready to move you forward.

60 years of OE technology and expertise.

Delphi Technologies is proud to deliver OE technology and expertise to create green and global solutions – remanufacturing supports our focus on green by keeping parts on the road and out of landfills. Our remanufactured all makes injectors reflect our OE technological know-how ensuring each injector meets our specifications and provides optimal engine performance.

Each pump and injector is completely disassembled, the components cleaned and examined for wear and breakage. All critical, worn out or non-functioning components are replaced with new parts to help ensure reliability and performance. Then, each injector is reassembled and tested for compliance in fuel delivery, injection pressure and timing. Our remanufacturing process is streamlined, efficient and meticulous, demonstrating our commitment to Delphi Technologies quality.

Trust Delphi Technologies to ensure your parts are ready for the road ahead.

		EX836100	28526390, 7334031REM, 7256789	

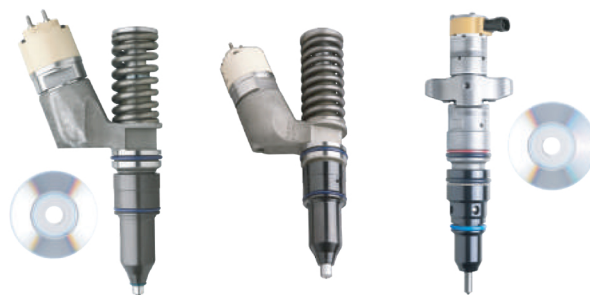

* When replacing this flat seal type injector, all of the injectors on the engine must be changed to the latest conical sealing type.

Did You Know?

To ensure proper engine performance, the new unique trim code provided with applicable C7, C13 and C15 injectors must be entered into the ECM.

The trim code eliminates any variation in injector performance due to small differences in manufacturing tolerances, friction between components and fuel flow.
