

# 6.7 ISB CUMMINS DODGE FUEL INJECTOR SUPER INSTALL KITS

## Three levels of this kit includes:

### **Basic kit-**

Full set of reman 6.7 ISB Injectors  
6.7 High pressure tubes  
Valve cover gasket/wiring harness  
Intake gasket

### **Stage 1 Kit-**

High pressure lines and hold down bolts added

### **Stage 2 Kit-**

New Bosch OE fuel rail added

*DURABILITY,  
PERFORMANCE, FUEL EFFICIENCY*

## Reman 6.7 Injectors

These are reman injectors carrying a 24 month unlimited warranty. Injectors are fully sealed for install (O'rings and copper washer)

## 6.7 High pressure tubes and lines

These should always be changed due to erosion from continuous high pressure and heat, as re-using old tubes can lead to leaks, contamination and premature injector failure

## 6.7 Valve cover gasket/wiring harness, intake gasket and hold down bolts

1 time use parts necessary to change when removing the valve cover. Wiring harness provides new connections both under the valve cover and externally, while bolts become stretched after reuse and prone to loosening

## 6.7 High pressure fuel rail

Brand new OE Bosch fuel rail with new OE RPS and excess pressure relief valve. Reusing old rails leads to contaminating new injectors with stored metal particles possibly seizing injectors and leading to catastrophic failure
