NEW the ability to **Recore**
DOCs, DPFs and SCR systems

Introducing the new patent pending method for Recoring your Diesel Oxidation Catalysts and Particulate Filters

**DON'T REPLACE IT.
RECORE IT.**

📍 **AUTHORIZED RECORE CENTER**

This game changing program will change the way the industry replaces and services their after-treatment technologies

Why Recore?

- Minimal down time
- No more waiting days for replacement parts
- Eliminate the frustration of trying to find or source the right part

Ordering DPF, DOC, and SCR systems will never be the same again due to RECORE.

Key advantages include but not limited to:

- *Faster turn around*
- *Guaranteed fitment as it is the same unit you removed*
- *Significant cost reduction*
- *No waiting around for parts to arrive*
- *No degraded units due to poor cleaning*
- *Improved performance as it is a new product*

This isn't just for trucks, this is for any emission control technology. Your Recore Center can RECORE ANY unit whether it be construction, off road, tractors, excavators, gen sets, etc.

Why waste time and money replacing usable emission control technologies when they fail or need replacing? Now you can RECORE them, yes that's right you can RECORE all your DOC and DPFs with brand new cores from your local Superior RECORE Center.

The process is simple, take your old unit in, have a new RECORE installed and be back on the road in as little as a day. The Recore process itself is FAST & EASY!
